A. Required Packages

None

B. Start Command

`sudo npm install`

`npm run dev`

C. Optional

Svelte for VS Code - VS Code Extension

5. Solid JS

A. Required Packages

None

B. Start Command

`sudo npm install`

`npm run dev`

C. Optional

None

6. Note

I have utilized the Client-Server Web Development Elementary Virtual Machine for installation and creation of the projects. I advise you to move all projects on to the Elementary Virtual Machine before performing any operations within them, to avoid any permission-based errors.
